

Dentist partners with Vista magnet school science department

North County Times, Community, October 8, 2008 8:05 AM PDT

The Center for Smile Enhancement (John Coleman, D.D.S.) and the Vista Magnet Middle School Science Department have partnered to promote science and the science department. Smiles for Science Charity is an effort to raise needed funds for school science departments.

A person is referred to the office for a professional teeth whitening valued at \$395. Coleman donates all materials and labor and discounts the cost to \$150. People receive a professional teeth whitening at a great value, and write a tax-deductible check right to the charity so 100 percent of every dollar gets to the kids.
